

Did you know? Burlington/Mebane Pediatrics now provides Care Management in house. We have a team to help patients and families navigate the process to connect to vital resources that may have presented themselves with multiple barriers in the past.

What are we? An inter-disciplinary care team that consists of in house Pediatric Care Managers, Referrals Coordinator, Registered Dietitian, and Certified Behavior Health Coaches who all work together to provide support in achieving health and well being goals by coordinating a team approach to support your family along the way!

How does it work?

- 1. Meet your Care Manager**
- 2. Tell them what you need**
- 3. Check in on progress**

With these 3 easy steps you will meet with your Care Manager every three months (or earlier) to share your child's progress and discuss any unmet or emerging needs. By having a team approach, you will create a detailed plan specific for your child's needs which provides our care team to know your top goals for your child's health and well being.

By taking advantage of these services offered it will allow you to spend more time with your child and less time coordinating your child's care needs!

MEET YOUR BURLINGTON PEDIATRICS CARE TEAM!
