Burlington Pediatrics

What is a Medical Home?

We at Burlington Pediatrics are proud to be your child's medical home. A medical home is a way to provide high quality health care services that best meet the needs of your child and your family. It is not a building, house or hospital. It is a partnership between you and your family and your primary care doctor, nurse and clinic staff. Together, you make sure that the medical and non-medical needs of your child are met.

What Can Your Family Do?

Below is a list of some things you can do to get the best health care for your child:

- ~ Bring questions to doctor visits
- ~ If you need it, ask for extra time when you schedule your visit
- ~ Keep a folder or notebook with your child's health information
- ~ Share any changes with your doctor
- ~ Celebrate successes and talk about challenges
- ~ Ask for something to be explained if you don't understand
- ~ Work together to make a plan
- ~ Ask for information to be written down
- ~ Ask to meet with office staff who will be working with you and your child
- ~ Let your doctor and staff know things they are doing right
